

Wheelie Poppin' Fun Right Out Of The Box!
HPI adds a whole new dimension to fun with the Wheely King! The Wheely King is all-out, car-crushing, wheels-in-the-air fun!

As the name suggests, this car is all about wheelies! With its tuned weight distribution and wheelie bar, the Wheely King makes it easy to pop a wheelie on demand - just pull the trigger and go! Watch the front wheels rise into the air as the weight of the truck goes onto the rear wheels! Easy to drive and a joy to watch, the Wheely King will be the most fun vehicle in your RC garage!

MASSIVE WHEELIES

The Wheely King is the first-ever true scale monster truck that features awesome wheelie action with every pull of the trigger! With perfectly balanced weight distribution and a rear wheelie bar, easy controlled wheelies are part of the action every time you drive the Wheely King! Watch it drive long stretches with its wheels in the air. See it pop a wheelie out of every corner out on the track. Steer the front wheels while they're in the air for hilarious antics! The Wheely King is the ultimate combination of true-to-scale monster truck looks and fun high-flying monster truck action!

REAL OIL FILLED SHOCKS

SCALE MONSTER TRUCK TUBE CHASSIS

HUGE GROUND CLEARANCE

Just Like The Real Thing!

The Wheely King is great for the show-and-go crowd - fat chrome wheels hold 5.4" all-terrain Mud Thrasher monster truck tires, and the Twin Vertical Plate (TVP) chassis features a super cool chrome-plated tube design that looks just like the real monster trucks you've enjoyed watching! The front and rear solid axles feature pivot joints and a realistic multi-link monster truck suspension for easy driving and control, plus the ultimate scale look! Topping off the Wheely King is a painted and trimmed monster truck body, mounted on adjustable body mounts that allow you to fit all kinds of fun and exciting bodies. It all adds up to a great kit and hours of enjoyment!

It's not just about its good looks, however - the Wheely King lives up to its name from the second you pull the trigger! With its strong 540-size motor and solid-axle 2WD drive train, the Wheely King is a joy to drive around tight, twisty circuits or down the street!

No Terrain Too Tough!

The unique monster truck-style multi-link suspension gives the Wheely King huge amounts of front suspension travel - combined with the all-terrain semi-pneumatic rubber tires and 4 oil-filled coil-over shock absorbers, the Wheely King is perfect for crawling over kerbs, grass and anything that gets in your way! Putting the power to the rear straight axle is an efficient and tough universal slider shaft, perfect for keeping the muck and dirt out of the drive train! Protecting the drive gears is a strong plastic cover, held in place with convenient body clips. A full set of metal ball bearings enhances the efficiency of the drive train, helping the Wheely King get over 20 minutes of runtime out of its 7.2v battery!

Racing the Wheely King is a blast, too! Durable, easy to drive and loads of fun, it's great to see it go on its rear wheels as you accelerate out of a corner! Time your laps on any RC or BMX track, or get two or more Wheely Kings out there for even more fun and driving antics!

The 1/12th scale size of the Wheely King is perfectly suited for the back yard basher and its simple and durable design allows for ease of maintenance and the ability to soak up almost any kind of abuse you can throw at it.

Everything Included! (#10825)

With a completely assembled chassis, painted body and a full set of electronics, it's a simple matter of charging the battery to have some fun! The Wheely King features the high-quality, proven HPI TF-1 27MHz transmitter. The SF-1 servo is reliable, durable and plenty strong for the Wheely King, performing its duties under all conditions. The installed reversible electronic speed control (ESC) features a reverse delay to protect the gear box and drive gears, and gives the Wheely King maximum runtime while you're out having a blast. For the ultimate in control and feedback from the truck, the Wheely King features fully proportional steering and throttle. A high-torque 540-size 27-turn motor is used to power the Wheely King and is easily upgradeable to any normal 19-turn or faster motor. The 7.2v 1500mAh Ni-Cad battery gives you over 20 minutes of smile-inducing runtime, and comes assembled with quick-change connectors. Charge the battery with the handy included wall charger, or use any standard RC battery charger.

All electronics are standard size and feature industry-standard connectors for easy upgrades and full compatibility with most common RC electronics. That means you can easily use the Wheely King radio gear with any other car as well or you can upgrade every individual component of the radio gear in your wheelie as you wish. The Wheely King is easy to upgrade - install a faster motor for insane top speeds, or pop in a different battery for even longer runtimes!

Get into the car-crushing spirit of the monster truck! Get the Wheely King!

PERFECT FUN SIZE!

Because the Wheely King is 1/12th size, it's smaller than the 1/10th size E-Savage and it's just as fun! The Wheely King can be easily driven indoors because of its smaller size, but it's also perfect for fun in the garden and even out on the racetrack!

LENGTH: 431.8mm
 WIDTH: 297.2mm
 HEIGHT: 254mm
 WHEELBASE: 238.8mm
 TIRES: 135mm x 69mm
 SUSPENSION TRAVEL: 152.4mm

UP CLOSE

Performance

Perfectly tuned weight distribution for on-demand wheelies!

Wheelie bar lets you control the wheelies

Monster truck multilink suspension for maximum wheel travel!

Real oil-filled coil-over shocks, not friction dampers! You can change the oil to tune the truck for any surface!

Full set of ball bearings for efficiency and long run time

Efficient sliding center universal drive shaft for smooth power transfer

Quick change battery box holds the 7.2V stick pack securely and allows easy pit stops and fast battery changes for non stop fun

Efficient 2WD transmission with very low friction

Efficient fine pitch (48dp) gear box

Scale Looks

Ultimate scale monster truck realism

"Chrome-plated" tube chassis for ultra-cool looks

Matching chrome coloured screws for perfect finish

5.4" all-terrain Mud Thresher tractor-tread rubber tires

Adjustable body posts make mounting new bodies quick and easy.

Fully painted and trimmed monster truck body

Tough

Tube-style Twin Vertical Plate (TVP) chassis as known from the tough HPI Savage

Front and rear bumpers for crash protection

Front and rear solid axles for extreme durability

Sliding universal driveshafts for ultimate drive train protection

Clip-on nylon gear cover keeps out rocks and dirt

Servo saver protects the steering servo against crashes

RTR Convenience (#10825)

Electric power means it's quiet and easy to use - just switch on and go!

High-quality HPI TF-1 27MHz transmitter for ultimate control and performance

Fully proportional steering and throttle for maximum feedback and control

Reversing electronic speed controller (ESC) lets you back out of tight spots!

Standard-size 540-size motor allows you to easily upgrade for monster speeds!

7.2v 1500mAh Ni-Cad battery with quick connectors gives super-long runtimes, standard size is compatible with loads of aftermarket batteries

WHEELY KING RTR "READY-TO-RUN"

#10825 - WHEELY KING TRUCK, PRE-PAINTED BODY SHELL

Ready-To-Run (RTR) Wheely King Truck with pre-painted, pre-decaled bodyshell, radio gear and electronics. Includes comprehensive instructions manual.

New Wheely King Truck without radio gear!

#10827 - WHEELY KING TRUCK with MINI GT-1 TRUCK BODY

* Batteries, charger and radio gear are not included.
