

HIGH PERFORMANCE DRIFT GEAR

STAGE D / HIGH PERFORMANCE DRIFT GEAR STAGE D / HIGH PERFORMANCE DRIFT GEAR

Exciting two new models of the STAGE D EP series created in collaboration with ART FACTORY GRAPHICS!

The STAGE-D is the HPI's drift brand and the STAGE D EP series feature great drive performance and reasonable price based on the SPRINT 2. Two kinds of tires are included (STAGE-D drift tires and racing radial tires) so that you can enjoy either drift driving or grip driving. The car comes with SATURN 20T motor with the optimized torque characteristics. The STAGE-D EP version is a perfect drift car for everyone who wants to try and enjoy drift driving!

ART FACTORY GRAPHICS has a charismatic presence in vinyl-graphic world for full-size cars. The stylish and innovative decals designed by ART FACTORY GRAPHICS make fresh and exciting additions to the RC industry.

OPTION PARTS

The ultrasmall yaw control sensor in the D-BOX weighing only 6.7g detects your machine's tail sliding and the optimized automatic counter-steering prevents your car from spinning. The D-BOX allows even drift-beginners to enjoy dynamic drift driving, so it is a perfect item for those who want to try drift driving or think drift driving is too difficult. The D-BOX comes with a gain control function to adjust counter-steering amount according to track surface condition and your drift driving skills. Compatible with most servos available on the market.

Size: 22.2x22.8x8.9mm
Weight: 6.7g
Operational voltage: DC4.8V-6.0V
