

KFX 700

Kawasaki

Based on the popular RTR Savage 25, HPI Racing has worked closely with Kawasaki to produce a fully licensed RC Kawasaki KFX 700 Monster ATV that will be available for the holiday season - adding a whole new perspective to the Savage monster truck!

Approximately 1/5th the size of a real Kawasaki KFX 700 Quad, this bright green monster will come complete with a miniature ATV Rider for a realistic look. The legs of the rider are tethered to the body so that it can move around over jumps just like a real ATV rider.

Extra strength and flexibility have been added to the rider material, making it durable enough to handle extreme R/C driving...with no broken bones! Everyone that sees the ATV rider moving around while driving is instantly drawn to it, commenting on the scale realism. Drivers will find that the rider adds excitement over jumps and stunt driving, a definite boost to the "fun factor" of R/C driving.

KFX 700

Kawasaki

The RC KFX 700 Monster ATV is based on the famous HPI Savage 25 RTR. So it has got the same proven tough chassis layout and all the great features that made the Savage the most popular big block monster truck in the world.

It is powered by the HPI Nitro Star S-25 engine, a proven performer that is ideally suited to off-road driving. A 2 speed transmission is standard equipment for quick acceleration and high top speed. For convenience, the popular Roto Start System is included - a press of the button makes the engine roar to life! A new dual stage air filter is now standard equipment for added engine protection and extended time between maintenance intervals!

As the RC Kawasaki KFX 700 Monster ATV is based on the extremely popular HPI Savage 25 truck, spare parts are already in stock at hobby shops, and a wide variety of factory option parts and aftermarket upgrades are readily available.

SAVAGE 25

The new RC Kawasaki KFX 700 comes completely factory assembled; everything is done for you - even the tires are glued to the wheels. In less than 15 minutes you can be driving your Monster ATV! To top it off, we gave the KFX 700 the famous bright green Kawasaki paint, making it instantly recognizable to ATV enthusiasts. The entire body is completely ready to go right out of the box... painted, decaled, trimmed and mounted. Both a complete Instruction Manual that covers the entire assembly/disassembly process and a HPI Racing DVD are included!
