

We now have "EVO" version of NITRO RUSH, our super-popular stadium truck. The NITRO RUSH EVO has attractive new features such as newly designed high-power T-15 engine with much greater acceleration and top speed and roto start system to easily start the engine with a single button. The greater engine power is supported by new heavy-duty chassis (2.5mm) and heavy-duty engine plate to show great durability and reliability even in aggressive driving.

roto start
shaft drive starter

Rotostarter system (#563, #567)

PRE-ASSEMBLED CHASSIS WITH PRINTED AND TRIMMED BODY

The newly designed printed and trimmed body looks stylish in combination with the popular F5 spoke wheels, the new "X" rear tires and ribbed front tires. You can enjoy driving just by mounting a radio you have on the pre-assembled chassis. All the existing NITRO RUSH option parts can be used for upgrading. The NITRO RUSH EVO features a simple 2WD system, higher power, and easy-to-use power unit so that anyone can easily enjoy off-road driving with the car.
