

Savage X 3.5 RTR debuts! Inheriting the X technology, this ready-to-run giant truck was made as an entry model of the Savage series with no compromise of performance!

The Savage 3.5 RTR, a popular entry model among the Savage series, was reborn as the Savage X 3.5 RTR! Coming equipped with the latest "X" platform, the Savage X 3.5 RTR evolved to have much higher performance and durability and the maintenance intervals are much longer now. HPI developed the Savage 3.5X RTR, aiming at great performance at the least possible price to satisfy beginners. Priced almost JPY20,000 (USD175) lower than the Savage X 4.6 RTR, the Savage X 3.5 RTR contains almost the same parts as the Savage X 4.6 RTR, except for the engine displacement and the starter system. Completely preassembled with almost all items required, you can start driving the Savage X 3.5 RTR on the same day you purchased the kit.

Newly developed Nitro Star F3.5 Engine

Dual Stage Air Filter

8 Long-stroke Oil-filled Shocks

Dual Chamber Tuned Pipe

All Rounder GT2 Tire & Chrome Warlock Wheel

Low Center of Gravity TVP Chassis Plate

The low centre of gravity chassis drops the engine, centre gearbox and radio 5mm lower than the Savage 25, resulting in better handling and faster lap times.

Fiberglass Dual Disk Brake

Adjustable dual disk fade-resistant brake set for incredible stopping power.

Heavy-duty 4 Bevel Differential Unit

Aluminium diff cases to prevent spreading of the internal gears.

All Rounder GT2 Tire & Chrome Warlock Wheel

New lightweight GT-2 tyres with aggressive tread pattern for excellent all-terrain traction and long tyre lifetime. To add cool looks, the GT-2 tyres are mounted and pre-glued on Chrome Warlock wheels.

Newly developed Nitro Star F3.5 Engine

composite carburetor helps deliver stable performance even in high temperature.
