

HPI Racing is proud to announce the new **Nitro MT 2 18SS+** 1/10th scale 4WD high performance truck kit. The "plus" means added speed, added handling, added traction, and added looks. Our engineers took the tough and fast Nitro MT 2 18SS truck kit and added a list of upgrades to help you kick even more mud into the face of the competition.

New features include an aluminum tuned pipe to get extra snort out of the screaming 18SS engine, new machined steel differential gears for extra toughness, sticky S-Compound Ground Assault tires for maximum traction, tough black Scorch wheels for a stealth look, a new free-breathing two stage air filter, Dirt Force off-road body, and an ultra tough 2.5 mm gray anodized chassis.

The Nitro RS4 MT 2 18SS+ is a high performance kit version, specially designed for R/C enthusiasts who enjoy the process of building their trucks and adding their own radio equipment.

#### **New Nitro RS4 MT 2 18SS+ Features:**

##### **Aluminum Tuned Pipe**

For extra power and efficiency from the 18SS engine.

##### **Sticky S-Compound Ground Assault Tires**

Just tell the dirt that it won't hurt...too much.

##### **Machined Steel Differential Gears**

Precision machined out of steel to handle the power of the 18SS engine.

##### **Scorch Wheels**

Killer looks and super tough.

##### **Two Stage Air Filter**

More airflow for increased power, superior filtering to protect the engine.

##### **Clear Dirt Force Body**

Style and toughness, an unbeatable combination.

**Gray Anodized 2.5mm Aluminum Chassis**  
Ultra-tough construction, now in stealth gray.

**Nitro RS4 MT 2 18SS Existing Features:**

**Powerful 18SS Engine**

High torque, 1.5 horsepower engine that is easy to tune and maintain. Perfect for "outlaw" class racers. One of the most powerful small block engines available!

**100cc Fuel Tank**

Large 100cc fuel tank for increased run time. Low profile design for improved handling.

**Adjustable Body Mounts**

Quick, easy mounting for a wide variety of body styles.

**Skid Plate Front Bumper**

Angled nylon skid plate front bumper helps protect the truck on hard impacts and adds realistic looks.

**Sealed/Removable Radio Tray**

Removable radio tray for quick, easy and safe cleaning. The receiver cover protects electronics from the elements and spilled fuel.

**Long Stroke Shocks**

Long stroke shocks to soak up bumps and land smoother. New shock design allows for quick and easy shock rebuilding. Stiff shock springs for excellent handling.

**Revised Gear Ratio**

New gearing for a maximum top speed in excess of 46mph!

**Universal Joints**

Captured design universal joint - strong and easy to rebuild. The unique design eliminates the set screw found on most universal dogbones, making routine maintenance easier.

**Stainless Steel Hinge Pins**

For durability and smooth suspension arm movement.

**Heavy Duty Clutchbell**

Savage-style clutchbell design with dual sealed ball bearings for improved alignment, higher efficiency and extra durability.

**Heavy Duty Outdrives**

Stronger outdrives to handle the powerful 18SS engine.

**Purple Sealed Ball Bearings**

Complete set of sealed ball bearings makes the drivetrain smooth, efficient and fast.

**Cast Aluminum Hex Hubs**

Metal wheel hubs replace plastic parts to help handle the extreme power of the 18SS engine.

**Adjustable Steel Turnbuckles**

Easy suspension adjustments for maximum performance and handling.

**Shaft Drive 4WD System**

Proven tough shaft drive system with full time four wheel drive for excellent handling, durability and protection against rocks that can get stuck in the drivetrain of belt-driven cars.

**Slipper Clutch**

Prevents damage to the spur gear and drivetrain during extreme driving.

**High Flow Aluminum Header**

High performance aluminum header maximizes power output for quick acceleration and high top speed.

**Machined Aluminum Engine Mounts**

Precision machined aluminum keeps the engine cool, anodized purple for custom looks.
